

AHMED BAIG

Full Stack Trainee

Karachi, Pakistan | 03360372031 | ahmedbaig6512@gmail.com

SUMMARY:

Passionate Software Engineering student at NED University seeking an internship to apply and expand my skills. Proficient in multiple programming languages, frameworks, and tools, with a strong foundation in programming, data structures, OOP, DBMS, and software development. Enthusiastic about full-stack development in MERN. Eager to contribute to a team while enhancing technical expertise in a professional environment.

EDUCATION:

NED University of Engineering and Technology (Sep 2022 – Present)

Bachelor's in Software Engineering

Adamjee Government Science College (Mar 2020 – 2022)

Intermediate in Mathematics

EXPERIENCE:

Codesy Consulting – Software Development Intern

Onsite | July 2025 – Aug 2025

- Developed responsive and dynamic web interfaces using React.js and Next.js
 - Identified and resolved **UI and functional bugs**, improving application stability.
 - Integrated REST APIs into frontend applications for real-time data rendering .
 - Built cross-platform mobile features in React Native.
-

TECHNICAL SKILLS:

- **Programming Languages:** C++, JavaScript, Python
- **Web Development:** HTML, CSS, JavaScript
- **Frameworks & Libraries:** React, Next JS, Node.js, Tailwind CSS, Bootstrap, Socket.IO

- **Databases:** PostgreSQL, SupaBase, MySQL, MongoDB
 - **Tools:** MS Office, Figma, Adobe Illustrator, Adobe Photoshop
-

PROJECTS:

SadaqaSafar – Donation Platform (MERN Stack)

- Developed a full-stack donation platform where users can donate to registered NGOs and chat with them in real time.
- Implemented real-time messaging using Socket.IO for seamless communication between users and NGOs.
- Designed a secure authentication system using JWT for user and NGO logins.

PC Part Picker – PC Build Assistant (MERN Stack)

- Created a web application that allows users to select PC components and calculate total build costs.
- Integrated detailed product specifications from an extensive database of PC components.
- Developed a filtering and sorting system to help users find compatible and budgetfriendly parts.

Library Management System (C++ OOP)

- Built a command-line application for managing book records, issuing books, and tracking borrowed items.
- Utilized object-oriented programming principles (OOP) to create reusable classes for books, users, and transactions.

Python Game – Reaction & Memory Trainer (Tkinter)

- Developed an interactive desktop game consisting of three mini-games to test and improve reaction time and memory.
- Designed a simple and engaging UI using Python's Tkinter library.

Full Stack Ecommerce Web Application(MERN Stack)

- Developed a responsive and scalable e-commerce platform using MongoDB, Express.js, React, and Node.js, supporting both user and admin roles.

- Implemented user authentication and authorization using JWT, with protected routes for secure operations.
 - Built an admin dashboard for product management (CRUD operations), order tracking, and user monitoring
-
